BURGUNDY

Embrace new organic, ethically and ecologically sourced atmospheres.

We are slowing down our pace, in search of peace, re-investing our lives with a sense of value and spiritual worth. Our homes become our nests: this is where we become like birds gathering objects and textiles, assembling matter, taken from nature, from our past and present experience, in order to rediscover local colors and Sunday design.

From simplicity to luxury to fantasy to exuberance... our nest is an open-ended situation where we combine our inspirations, material and colors.

A search for balanced and sustainable living

A search for balanced and sustainable living comes together with the need to indulge in excess: luxury becomes more rare, precious, personal and bespoke, but also more considered, curated, eco-relevant and tied not into seasons, but into the lifestyle needs. Our tiles are designed for fitting intimate spaces and atmospheres.

Colors and surfaces are as natural as the real stone and our premium quality technology assures useful, sustainable and long-lasting features.

SHADE VARIATIONS

The color and shade of all tiles vary to some degree. This variance can be from piece to piece and can also occur from production run to production run.

American National Standard Specifications for Ceramic Tile (ANSI) has implemented a guide that rates ceramic tile on a five-point scale and ranges from V0 through V4.

Instituting the ANSI's color shade variation guidelines you will reduce customer complaints and sell the unique and individual beauty of each ceramic tile.

V0 Very Uniform Appearance

Pieces of the same shade value are very uniform and smooth in texture.

V1 Uniform Appearance

Differences among pieces from the same production run are minimal.

V2 Slight Variation

Clearly Distinguishable differences in texture and/or pattern within similar colors.

V3 Moderate Variation

While the colors and/or texture present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

V4 Substantial Variation

Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or texture from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

SHADE VARIATION AND APPLICATIONS			
V3	Residential	Commercial	Industrial
 MODERATE VARIATION	Floor	•	•
	Wall	•	•
	Countertop	•	•
	Pool	•	•

Water, oil, grease, or other fluids create slippery conditions. Floors with exposure to these conditions require extra caution in product selection and proper maintenance.

CARE & MAINTENANCE

Burgundy is a stain-resistant porcelain tile. Routine maintenance will keep your tile looking new for years to come.

Ragno USA's products are typically easy to install and maintain using the following general guidelines:

- Choose tile from same dye lot and caliber whenever possible
- Select tile alternately from several boxes and rotate when installing
- Follow industry-accepted installation practices as detailed by Tile Council of America "Handbook for Ceramic Tile Installation" or those recommended by the Ceramic Tile Institute of America
- Remove all grout residue promptly after application; neither acid cleaning nor sealing is recommended
- Clean regularly with clear water and/or a neutral (soapless) cleaner, wipe dry to lessen slippery conditions

TECHNICAL SPECIFICATIONS

DESCRIPTION	ANSI STANDARD	RESULT	ASTM TEST METHOD	
Water Absorption	≤ 0.50%	≤ 0.50%	C373	
Frost Resistance	As Reported	Resistant	C1026

Breaking Strength	20" x 20" 13" x 13"	≥ 250 lbf. ≥ 250 lbf.	≥ 530 lbf. ≥ 400 lbf.	C648 C648
Facial Dimension	- 3.0 % ≤ Nominal ≤ 3.0 %	Within Standard	C499	
Thickness	≤ 0.04 in (1.02 mm max)	Within Standard	C499	
Wedging (Squareness)	+/- 0.50 % or +/- 2.0 mm**	Within Standard	C502	
Warpage (Flatness)	+/- 0.75 % or +/- 2.3 mm**	Within Standard	C485	
Abrasion Resistance	Class 0 - Class V	Class IV	C1027	
DCOF - Dynamic Coefficient of Friction (Wet Areas Only) [†]	As Reported	Minimum 0.42	DCOF AcuTest SM *	
SCOF-Static Coefficient of Friction (Wet)	As Reported	0.60 ≤ SCOF < 0.70	C1028	
SCOF-Static Coefficient of Friction (Dry)	As Reported	0.70 ≤ SCOF < 0.80	C1028	
Chemical Resistance	Class A - Class E	Class A	C650	
Stain Resistance	Class A - Class E	Class A	C1378	

[†]Dynamic Coefficient of Friction (DCOF) - Water, oil, grease or other fluids create slippery conditions. When installing floors in areas with exposure to these conditions, a minimum D.C.O.F. value of 0.42 is required. Additionally, extra caution is required with regards to product selection and proper maintenance. Visit www.tcnatile.com for complete information regarding the DCOF Acutest test method and values. *DCOF AcuTest is the industry designation for the test procedure contained in ANSI A137.1 Section 9.6, which has been extensively researched, allows for in-situ field measurements, and is in use at tile manufacturing facilities. It was so named to distinguish it from other DCOF measurements using different instruments and/or protocols. **Whichever is less
