

CATHEDRAL STONE
GLAZED PORCELAIN STONEWARE

We live in a world of
impressions

searching for truth and reality in our evolving environment

Our work has taken a contemporary twist, turning a new eye on nature, culture, time and perception. We have been inspired by the shapes and colors of natural stones to build new architectures and spaces where it's easy and exciting to live in. Drawing its inspiration from the world around, Ragno USA bases its search on high quality features to offer a strong and versatile product, perfect for expressing projects and experiences: this is Cathedral Stone.

We have to train our eyes to see a different beauty

From impressions to reality: Cathedral Stone is transposed into a contemporary setting for interior designers and consumers. Artificial, cultural, residential, natural and urban features describe this "new territory" where Cathedral Stone branches out with all its uncommon potential. Cathedral Stone should be seen as a compelling, competitive and alternative product to the natural stone it imitates. It allows laying solutions played on different sizes, shades and contrasts between warm tones of beige and brown. Light, simple patterns animate the surface without becoming invasive, highlighting the beauty and depth of the ceramic material aiming for simplicity and understatement.

Modify your perception to be impressed from reality

Today it's not objects that attract, but the gestures and connections they bring about, and especially the time these products give or save us: time that is enhanced. We want to be transported somewhere else within the relative safety of our homes: we want complexity to be turned into simplicity. We want to be surprised from the ordinary. Therefore, Cathedral Stone with its primal appeal, enhanced by a velvety surface and simple patterns, offer a new kind of elegance that blends natural inspiration with contemporary suggestions. The resistant, compact, fully vitrified stoneware composition offers a structured, yet non-porous surface that guarantees excellent resistance to general wear, offering all the aesthetic appeal of natural stone along with the practical cleaning characteristics associated with non-absorbent materials.

Shade variations

The color and shade of all tiles vary to some degree. This variance can be from piece to piece and can also occur from production run to production run.

The Ceramic Tile Distributor Association (CTDA), in cooperation with tile manufacturers and distributors, has put together helpful literature entitled the CTDA Color Shade Variation Guide. This guide rates ceramic tile on a four-point scale and ranges from V1 through V4.

Instituting the CTDA’s color shade variation guidelines you will reduce customer complaints and sell the unique and individual beauty of each ceramic tile.

V1 Slight Shade Variation

The range of color and/ or finish within the same shade is relatively uniform from tile to tile.

V2 Average Shade Variation

The range of color and/ or finish within the same shade is moderately noticeable from tile to tile.

V3 Heavy Shade Variation

The range of color and/ or finish within the same shade is distinctly different from tile to tile.

V4 Extreme Shade Variation

The range of color and/ or finish within the same shade is extensively random from tile to tile.

SHADE VARIATION AND APPLICATIONS

V3 HEAVY VARIATION		Residential	Commercial	Industrial
	Floor	•	•	
	Wall	•	•	•
	Countertop	•	•	•
	Pool	•	•	•

Water, oil, grease, or other fluids create slippery conditions. Floors with exposure to these conditions require extra caution in product selection and proper maintenance.

Care & Maintenance

Cathedral Stone is a stain-resistant porcelain tile. Routine maintenance will keep your tile looking new for years to come.

Ragno USA's products are typically easy to install and maintain using the following general guidelines:

- Choose tile from same dye lot and caliber whenever possible
- Select tile alternately from several boxes and rotate when installing
- Follow industry-accepted installation practices as detailed by Tile Council of America "Handbook for Ceramic Tile Installation" or those recommended by the Ceramic Tile Institute of America
- Remove all grout residue promptly after application; neither acid cleaning nor sealing is recommended
- Clean regularly with clear water and/or a neutral (soapless) cleaner, wipe dry to lessen slippery conditions
